# ALI AZZAM

Lebanon | +961 76 915 446 | aliazzzam20@gmail.com | LinkedIn | My Portfolio

## OBJECTIVE

Results-driven Full-Stack Developer and Cybersecurity Ambassador with expertise in React.js, Flutter, Firebase, and Laravel. Skilled in delivering production-ready applications featuring AI, OCR, real-time systems, payment processing, and cloud services. Combines full lifecycle development proficiency with cybersecurity best practices, actively promoting security awareness through Semicolon Academy. Seeking opportunities to build scalable, secure, and user-centric digital solutions that drive measurable business impact.

## EXPERIENCE

**Ambassador – Semicolon Security (CyberSecurity Community)**            Septembre 2025 – Present
- Representing Semicolon Security & Academy as a CyberSecurity Ambassador, Promoting security awareness and best practices.
- Organizing and participating in CyberSecurity events, CTF competitions , and workshops.
- Engaging in community outreach to spred awareness about cybersecurity pratices .

**Full-Stack Developer Intern – Violet Pro** — Lebanon, Tyr            June 2025 – August 2025
- Completed a 2-month internship while working on my Master's senior project. Handled back-end services and Firebase database integration.
- Built a full-stack **Car Reservation App (Drive Wise)** with:
- **Admin Web Platform:** React.js + Firebase .
- **Mobile App for Users:** Flutter + Firebase .
- **Key Features:** Email OTP (EmailJS), OCR for driver's license (Google Cloud Vision API), Google Maps Geolocation, Chatbot (Gemini API), real-time notifications (status updates, reminders, car replacement), digital contract, etc.

**Mobile Application Developer (Freelance)**            March 2024 – Present
- Developed mobile apps using Flutter.
- Handled back-end services and Firebase database integration.

**Web Developer (Freelance)**            March 2024 – Present
- Built custom websites for clients using modern stacks (React.js, Laravel, etc.).

**IT Intern – Imam al-Sadr Foundation**— Lebanon, Tyr            May 2023 – July 2024
- Contributed to internal software projects using VB.Net, Java, and Python.
- Handled database administration and hardware maintenance.

## EDUCATION

**Master of Science in Information System Engineering**            Jan 2024 – Present

Lebanese University – Faculty of Technology – Saida

**Bachelor of Engineering – Technology and Science of Information Systems**            Sep 2020 – Oct 2023

Lebanese University – Faculty of Technology – Saida

## CERTIFICATIONS

- **SE Factory Training Program.**                                    Apr 2025 –July 2025
  Phase 1: Flutter+ GenAI, Prompt Engineering + Employability Skills.
  Phase 2: Machine Learning + DevOps, MLOps, DataOps + Time Management, Communication.

- **CyberSecurity Course – SemiColon Academy.**                       Mar 2025 – June 2025
  Topics: Cryptography, Application Security, Reverse Engineering.
  Participated in a CTF in collaboration with Google Developer Group and SemiColon.

- **Full Stack Web Development Bootcamp – ESA Coding Lab (France).**   May 2024 – Dec 2024
  Completed intensive training; built 3 large-scale web apps.

## PROJECTS

- **Drive Wise – Car Reservation App (Master's Project)**                          2025
  Full-stack car reservation platform developed for my Master's thesis with admin web panel (*React.js + Firebase*) and user mobile app (*Flutter + Firebase*), featuring OTP authentication, OCR license verification, Google Maps integration, AI chatbot, real-time notifications, and digital contract management,etc.

- **ChronoTrack HR Attendance System (Frontend Only – Freelance Project)**         2025
  Employee attendance tracking web interface with check-in/out functionality and salary calculation (*React.js*).

- **Restaurant Mobile App (Freelance Project)**                                    2025
  Offline-first mobile app for restaurant with menu browsing, cart, and Stripe payment integration (*Flutter*).

- **Food Delivery Website (Freelance)**                                            2025
  Restaurant food delivery website similar to Toters (*React.js, Laravel, MySQL*).

- **Portfolio Website**                                                            2025
  Responsive personal portfolio with animated UI and contact form (*React.js*).

- **Mobile Notification App (Freelance)**                                          2024
  Real-time push notification mobile application for freelance client (*Flutter, Firebase*).

- **Chalet Reservation Website**                                                   2024
  Booking platform with dynamic calendar and reservation system (*HTML, CSS, JavaScript, PHP*).

- **Gym Management Website**                                                       2024
  Full-featured gym website for trainer booking, time slots, and equipment sales (*MERN Stack*).

- **Finance Tracker Web App with AI Integration**                                  2024
  Personal finance app with AI-powered spending analysis and summaries (*React.js, Gemini API, SQL*).

- **Android Pharmacy Delivery App**                                                2023
  Android application for ordering and tracking pharmacy deliveries (*Java, PHP, JSON*).

## SKILLS

- **Languages**: Python, Java, C, C#, VB.Net, JavaScript, PHP.
- **Frameworks & Tools**: React.js, Flutter, Laravel, ASP.Net, Android Studio, Firebase, SQL Server, MongoDB, GitHub, Docker, Figma, Kali Linux.
- **Expertise**: AI/ML, Neural Networks, DevOps, MVC Architecture.

**LANGUAGES :**  Arabic: Native | French: Fluent | English: Basic .
